

Jasper Leadership Statement

As members of Jasper Leadership, we share the vision of creating a community that is engaged and committed. The values we strive to uphold are service, collaboration, civility, and accountability.

We exemplify these values by:

Being authentic and vulnerable. We speak to what is true for us. We challenge our own assumptions, mental models and stories to enable us to be up to the challenge of living into our full, truest selves.

Acknowledging we have influence. Regardless of position, age, profession, we recognize we have the power to lead and model. We operate with a commitment to speak factually and accurately. We recognize our words and actions have impact. We assume positive intent in others and operate with high levels of integrity.

Respectfully engaging with others. We seek and value other people's opinions, ideas and perspectives. We listen more than we speak. We operate from the notion that clear is kind. We are mindful that central Yavapai County is comprised of all backgrounds, beliefs and life experiences and we commit to ensuring that all voices in the community are heard.

Being of service to our community. We actively lead and support initiatives, events, and activities within the community. We seek to understand the unique needs and challenges plaguing our community. We endeavor to make an impact and to leave behind a legacy.

Honoring our commitment to Jasper leadership. We understand the value and have committed to consistently participating in leadership activities. We embrace our journey as leaders and recognize we always have more to learn.
